

## Business Extended Area Service (EAS): Local Calling Region

EAS is a replacement for long distance (toll) service. EAS allows telephone customers in one local calling area (known as an exchange) to call one or more nearby exchanges, without incurring long distance charges. Instead of paying long distance charges, customers are given a choice between a flat monthly EAS rate and a measured EAS rate (i.e., a per minute rate) within the extended area. Long distance charges cease within the extended area. In sum, an EAS calling area is a toll-free calling area.

| EXCHANGE  | EAS RATE*   | EXTENDED AREA SERVICE (EAS)  |
